

■ ATOMQUEST PORTAL

HACKATHON 1.0 — SUBMISSION DELIVERABLES

■ Executive Overview

AtomQuest is a high-performance full-stack enterprise performance and OKR tracking portal. The system is designed to streamline quarterly reviews, ensure goal weightage compliance (perfectly summing to 100%), and maintain immutable, audit-ready SLA logs using Postgres row-level locks and advisory locks. The following deliverables comprise the official submission package for Hackathon 1.0.

■ Core Submission Deliverables

Deliverable	Access Link & Details
1. Live Hosted Demo	https://atom-quest-ten.vercel.app/ Vercel frontend integrated with Render REST APIs and Neon DB
2. Source Code Repo	https://github.com/NikhilMamilla/AtomQuest 100% clean, warning-free TypeScript repository
3. Architecture Specs	https://github.com/NikhilMamilla/AtomQuest/blob/main/ARCHITECTURE.md Immutable JSONB audits, row-locking schemas, cron advisory specs
4. System Diagram	https://github.com/NikhilMamilla/AtomQuest/blob/main/System-Architecture.png Detailed engineering flowchart & ERD

■ Interactive Sandbox Credentials

Evaluators can log in using these preset credentials on the landing page or leverage the one-click interactive copy sandbox widgets to test all user journeys:

Role	Test User	Email Credentials	Password	Testing Journey Scope
Employee	Sreemouna	sreemouna@atomquest.com	AtomQuest2026!	Create goals, validate weight sums, log actuals, submit quarterly metrics.
Manager	Hansika	hansika@atomquest.com	AtomQuest2026!	Approve/lock goal sheets, edit weights, review quarters, view team analytics.
Admin / HR	Nikhil	nikhil@atomquest.com	AtomQuest2026!	Assign users/managers, unlock goals, view JSONB audit logs, trigger escalations.
